Deloitte

Hiring Team

Subject: Application for Data Engineer

As a highly motivated and skilled Data Engineering professional, I am excited to submit my application for the Data Engineer position at Deloitte. With a Master's degree in Data Engineering from Northeastern University, where I focused on Big Data, Data Pipelines, and Distributed Systems, I have acquired a solid foundation in the technical skills required for this role.

During my tenure as a Data Engineering Intern, I successfully designed and implemented ETL pipelines using Apache Airflow, showcasing my proficiency in Python, SQL, and data modeling. My experience as a Graduate Teaching Assistant for a Database Systems course honed my ability to effectively communicate complex technical concepts to diverse audiences. Additionally, my volunteer work on a data cleanup project for a non-profit NGO demonstrated my commitment to using data analytics for social good.

I possess a diverse skill set that aligns well with the requirements of the Data Engineer position at Deloitte. My expertise in Python, Apache Airflow, BigQuery, and Spark, coupled with experience in ETL, Docker, and Cloud Functions, positions me as a valuable asset to your team. Furthermore, my proficiency in Linux Shell Scripting underscores my ability to work with a variety of technologies and platforms.

I am confident that my background in data engineering, coupled with my passion for leveraging data to drive business insights, make me a strong candidate for the Data Engineer role at Deloitte. I am eager to bring my technical expertise and collaborative mindset to your esteemed organization and contribute to innovative data solutions that drive strategic growth and success.

Sincerely,

Rohan Kapoor
