Subject: Application for Data Scientist

Dear Hiring Manager,

I am writing to express my interest in the Data Scientist position at your company. With a Master's degree in Data Science from the University of Washington, where I specialized in NLP, recommendation systems, and statistical modeling, I am excited about the opportunity to contribute my skills and expertise to your team.

During my internship at Amazon, I honed my skills in NLP by developing search ranking algorithms, which significantly improved search results accuracy. Additionally, my experience as a Machine Learning Engineer at StartAI allowed me to work on customer analytics and predictive modeling, where I leveraged Python, Scikit-learn, and PyTorch to derive valuable insights from data.

My skill set includes proficiency in Python, Machine Learning, and NLP, along with hands-on experience with AWS, SQL, data visualization, feature engineering, and A/B testing. I am confident that my background in developing NLP solutions and leveraging machine learning algorithms aligns well with the requirements of the Data Scientist role at your company.

I am eager to bring my expertise in data science and passion for problem-solving to your organization. Thank you for considering my application. I look forward to the opportunity to discuss how my skills and experiences align with the goals of your team.

Sincerely,

Aradhya Kapoor
